Our Major prize of \$1000.00 was won By Ross Kurth and the prize was presented by Robert and Catherine Bannon and the team from Main Street Meats.
Thank You to all that participated in this years Promotion and well done to all 8 winners

Do You Have Staff that would benefit from an associate Degree ?

It all starts with UC

Your path to progress starts with a single step

UC offer a new way of learning. It's all about giving you the real-world tools you need to create the future you want. UC gives you authentic, hands-on experiences that relate directly to your future career. By partnering with industry, we give you the very best learning experiences and job prospects. Our range of courses are offered online and face-to-face, so you can manage your study around your life. The associate degree courses run over 4 terms of 10 weeks per year, and commence on Monday February 4.

Associate Degrees on offer in 2019:

Applied Business specialisations:

- General Business is great for students wanting to gain an overall understanding of business practices such as marketing, project management and entrepreneurship.
- Tourism and Events focuses on the management, promotion and business of tourism and event organisations.
- Sport, Recreation and Leisure gives students an understanding of business management concepts in practical sport, recreation and leisure environments.
- Supply Chain Management focuses on the management of the supply of goods and services from the point of origin to the end customer.
- Local Leadership is for those working in the delivery of services to the community, with a focus on governance, compliance, leading people and project management.

AGRIBUSINESS- A blend of business studies in management, finance, marketing and planning with technical skills in agriculture.
APPLIED DESIGN -Developed in partnership with Foundry to give students a unique experience within creative industry education, right here in Tasmania.

APPLIED SCIENCE SPECIALISATIONS

- Fermentation Science and Separation Processes teaches students how Tasmania's premier bio industries make things like fermented food, wine, beer and cheese.
- Aquaculture integrates aquaculture subjects with core applied science subjects such as applied maths, quality management, and sustainability.

APPLIED TECHNOLOGIES SPECIALISATIONS

- Cyber Security is a blend of technical and professional skills, such as implementing security technologies to protect against hackers or credit card fraud.
- Sensors and Automation investigates the fundamentals of robotics and automation and their application to problems dependent on sensing the environment and the entities within it.

APPLIED HEALTH- This new associate degree has been designed for people who wish to begin or accelerate their career in health, disability, mental health, aged care or community services.
